

# Addressing Ankyloglossia, "Tongue-Tie"

**TONGUE TIE**

**LIP TIE**

**Tongue-Tie** (ankyloglossia) is a condition classified under TOTS (Tethered Oral Tissues) which is present at birth. It includes tongue, lip and cheek ties. This condition restricts the tongue's range of motion which can impact and interfere with eating, speaking, swallowing, and breathing. It also interferes with breastfeeding. Treatment varies with each case and may include a surgical procedure (frenotomy) for correction as well as an evaluation to ensure ongoing proper tongue/oral function.

For a list of providers that can evaluate for this condition, please view the back of this page or call 352-644-2726.

The following healthcare providers can assess and potentially treat tongue-tie and related conditions, including oral and swallowing concerns. DOH-Marion is **not** endorsing their services by providing this list. It is offered only as a guide to help families in this situation.
